#### Item 2.05. Cost Associated with Exit or Disposal Activities.

On September 12, 2008, inTEST Corporation (the "Company") approved a restructuring plan for its Manipulator/Docking Hardware and Tester Interface product segments to reduce the operating expenses of these product segments in response to continued operating losses. The Company will permanently close its manufacturing facility in Amerang, Germany and its engineering and sales office in the United Kingdom. The Company will implement temporary salary reductions for certain employees of both product segments and will also temporarily reduce the fees paid to members of the Company's Board of Directors. Moreover, the Company will implement permanent reductions for expenses related to its use of third-party vendors. Effective January 1, 2009, the Company will implement additional temporary and permanent cost reductions associated with its employee benefit plans.

The Company also approved workforce reductions in its Manipulator/Docking Hardware and Tester Interface product segments by 4 employees and 3 employees, respectively, which represents approximately 7% and 9%, respectively, of the total employees in these segments. The Company will incur approximately \$22,000 in total costs related to these actions for one-time termination

benefits.

The Company communicated these actions to its employees on September 17 and 18, 2008. The Company expects that the completed actions in these product segments and company-wide will reduce its annual operating expense structure by approximately \$2.7 million. The Company expects to incur one-time termination benefits and facility closure costs ranging from \$825,000 to \$1.1 million during the second half of 2008.

#### **SIGNATURE**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
