

inTEST Corporation Announces Staffing Additions

CHERRY HILL, N.J., Oct. 3 /PRNewswire/ -- inTEST Corporation (Nasdaq: INTT) today announced that Steve Radakovich has joined the inTEST operations team in Cherry Hill, NJ. Mr. Radakovich's responsibilities include the streamlining of manufacturing operations and managing the implementation of the Company's ISO9001 Quality Program.

Prior to joining inTEST, Mr. Radakovich was Director of Operations for the Semiconductor Test Products Division of Everett Charles Technologies (ECT) in Tempe AZ. Mr. Radakovich has 15 years experience in the semiconductor test industry, holding the position of Chief Operating Officer at ESH, Inc. prior to its acquisition by ECT.

inTEST also announced today that Roy Green has joined inTEST as a key member of its Interface Development Group. Prior to joining inTEST, Mr. Green was Director of Technology for the Semiconductor Test Products Division of Everett Charles Technologies (ECT) in Tempe AZ. Mr. Green has over 20 years experience in the semiconductor test industry, holding positions at ESH and Schlumberger prior to ECT.

Robert E. Matthiessen, President and Chief Executive Officer commented, "We are quite fortunate to have added Steve Radakovich and Roy Green to our organization. Steve has a great depth of knowledge and practical experience in the building of both standard and semi-custom products for the high technology world. Additionally, he has an impressive record in maximizing the efficiency, quality and throughput of engineering/manufacturing systems such as ours. Roy brings a unique range of knowledge of the semiconductor test industry and test technologies. His expertise will be invaluable to our interface solutions business. We look forward to benefiting from both Steve's and Roy's leadership as we continue to grow."

inTEST Corporation is a leading independent designer, manufacturer and marketer of interface solutions and temperature management products that semiconductor manufacturers use in conjunction with automatic test equipment in the testing of integrated circuits. Headquartered in Cherry Hill, New Jersey, inTEST has manufacturing facilities in New Jersey, Massachusetts, California, the UK and Singapore and design, sales, service and support offices in New Jersey, Massachusetts, California, the UK, Japan, Singapore, and Germany. Design, sales, service and support is also provided by inTEST personnel located in Arizona and Texas. SOURCE inTEST Corporation
